

Nicholas De Souza

Toronto, ON (647) 274-0204 desouza.nicholas@gmail.com [linkedin.com/in/ncdesouza](https://www.linkedin.com/in/ncdesouza)

PROFESSIONAL SUMMARY

Solution Engineer and former software engineer and founder with 10 years of experience building software and leading customer-facing technical work for strategic enterprise accounts across telecommunications, technology, and energy sectors. Builds and measures LLM agents and multi-agent systems for enterprise customers, carries field findings back to product teams, and turns hands-on work into workshops and enablement adopted by the broader field.

CAREER HIGHLIGHTS

Agentic AI Pilot at Scale

Took an AI sales coach from voice prototype to an 80-rep pilot, scaling to 4,000+ reps in Jan 2027.

Field-to-Product Feedback

Canada's first Data Cloud Zero-ETL integration with Snowflake; gap assessment sped a product patch.

Top Performer, Canada Solutions

Drove \$4M in FY25 revenue across strategic enterprise accounts.

Measured Agent Performance

Co-defined a triage agent's success metrics with forward deployed engineers; handle time fell 30%.

Scaled Enablement

Trained 270+ customers; curriculum adopted into Salesforce's official Data Cloud workshop.

Agent-Run Consultancy

Built a seven-agent system on Claude Code that delivered a two-month project in one week.

TECHNICAL EXPERTISE

- Agentic AI & LLMs:** Agentforce, multi-agent orchestration (Paperclip), Claude Code, Codex, RAG, voice agents, agent metrics
- Data Platforms & AI:** Snowflake, Salesforce Data Cloud, ETL/ELT pipelines, data unification, AI orchestration frameworks
- Enablement:** Workshop curriculum, product gap assessments, prototypes, proof-of-concept delivery
- Clouds & Automation:** AWS, Azure, Docker, microservices, Python, JavaScript (Node.js, React), API orchestration, event streaming
- Stakeholder Engagement:** C-level solution workshops, data strategy roadmapping, AI use case ideation and pilots

PROFESSIONAL EXPERIENCE

Lead Enterprise Solution Engineer · Salesforce, Toronto, ON August 2024 – Present

Collaborated with Account Directors on strategic enterprise accounts to shape account strategy, lead solutions engagement, and deliver compelling product demonstrations that showcased measurable business value and drove executive alignment.

Utilized expertise in account planning, technical discovery, agentic AI prototyping, Python modeling, complex demonstrations.

- Took an AI sales coach from a Speech Foundations voice prototype to an 80-rep, 10-store pilot (Sept 2026), with 4,000+ reps planned for Jan 2027, by co-building it with forward deployed engineers as a two-agent Agentforce system (role-play coach + certifier) in Axonify.
- Cut case handle time 30% and round trips from 5 to 3 for a major Canadian telecom's case triage agent by co-defining its success metrics (handoff completeness, round trips, resolution, handle time) with forward deployed engineers.
- Drove \$4M in FY25 revenue as Top Performer for Canada Solutions by leading technical discovery, solution strategy, and executive demonstrations on strategic enterprise accounts.
- Reconciled projected platform consumption to the vendor quote for a major Canadian telecom's multi-LOB data and AI architecture, by building a Python model of the Data 360 rate card and a three-year ramp.
- Restored customer confidence in a high-risk enterprise account by realigning executive stakeholders and redefining its technical strategy, earning an on-site access badge and becoming a strategic advisor to its executives.

Senior Solution Engineer · Salesforce, Toronto, ON

August 2022 – August 2024

Partnered with Account Executives on the Mid Market Presale Team to drive account strategy while delivering technical expertise in the discovery processes and demonstrated business value through product demonstrations.

Utilized expertise in account strategy, technical discovery, Data Cloud and Snowflake integration, workshop curriculum.

- Architected Canada's first Data Cloud Zero-ETL integration with Snowflake and accelerated engineering's dynamic-tables patch by leading diagnosis in the customer pilot, writing a gap assessment, and brokering product meetings.
- Trained **270+** customers across 9+ full-capacity workshops in Vancouver, Montreal, and Toronto by creating Canada's Data Cloud hands-on curriculum, later adopted into Salesforce's official developer workshop.
- Contributed to **\$2.8M** in FY24 revenue and earned a Sales Leadership nomination for Canada's SE of the Year, by leading discovery and business-value demonstrations for clients across industries.
- Mentored job candidates and new hires in discovery and persona-based business value demonstrations.

Solution Engineer · Salesforce, Toronto, ON

November 2020 – August 2022

Partnered with Account Executives on the SMB Presale Team to deliver technical discovery and recommend Salesforce solutions.

- Closed 55 deals valued at \$1.6M in FY22 as Top Performer for SMB Solutions in Canada, by leading discovery and recommending solutions across Sales, Service, Experience, and Marketing Cloud.
- Earned the "Star Performer Award" in Q4 FY22 by securing 16 new clients and \$1.1M in revenue for the quarter.
- Supported 5 Account Executives in receiving promotions by partnering with them to exceed sales performance metrics.

President & Founder · Digistax Inc., Toronto, ON

November 2018 – Present

As a Founding Partner of the Service Automation firm, responsibilities include hands-on software development, project management, client relations, sales and discovery, and project conceptualization.

Utilized expertise in multi-agent orchestration, Claude Code, Codex, SQL Server, MongoDB, AWS RDS, AWS Amplify, React JS, PHP, Microsoft Dynamics 365, APIs, NodeJS, GraphQL, SQL, NoSQL, and more.

- Delivered a three-release client project in **one week** versus an estimated two months by prototyping an agent-run consultancy on Paperclip: seven agents on Claude Code, Codex, and Grok with human approval gates.
- Reduced client onboarding timelines from 6 months to 3 weeks across 20+ engagements by designing and implementing reusable data migration frameworks.
- Eliminated **750+** hours of manual work annually and improved forecasting accuracy for multiple clients by automating business operations through API-driven solutions and CRM migrations.
- Led technical discovery and solution design for client transformations, and managed 2 software development interns.

Software / Innovation Engineer · Refined Data Solutions, Toronto, ON

September 2016 – November 2018

Identified inefficient manual processes, conceptualized automation solutions, and worked with technical and non-technical colleagues to define requirements, then designed, built, tested, and shipped them.

- Eliminated **200+** hours of labour per commercial property sale (30–40 sales/year) by building a Java EE microservice that automated the industry-required transfer of essential documents and integrated with the client's existing system.
- Reduced a 300+ hour bulk document update to under 4 hours with a ReactJS/Redux bulk file management application.
- Improved forecasting accuracy by building a Java EE service that normalized utility consumption against weather data.
- Cut a reporting task from 200 hours to 15 by writing a Python tool that extracted PDF reports from a Flash web application.

EDUCATION

Bachelor of Engineering (Honours), Software · University of Ontario Institute of Technology, Oshawa, ON

2018
